DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohmi et al. WO99/30809 (US 6,375,911 used as translation).

Regarding claims 1-2, Ohmi '911 discloses a method for treating a CVD exhaust gas comprising reacting in the presence of a transition metal (abstract) at 400 degrees Celsius or higher (see column 3, lines 2-5) and recovering HCl and halosilane (see Examples and column 6, lines 14-20).

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Burgie et al. US 5,401,872.

Regarding claims 1-2, Burgie '872 discloses a process for treatment of a vent CVD gas (see abstract and column 2, lines 21-26) comprising reacting hydrosilane and HCl in the presence of a transition metal catalyst (see abstract and column 2, lines 58-65), and recovering HCl and chlorosilanes (see Table 1).

Application/Control Number: 09/901,433

Response to Arguments

4. Applicant's arguments filed 2/24/04 have been fully considered but they are not persuasive.

It is argued that the '911 patent disclose a process to treat... silicon tetrachloride. This is not persuasive because Applicant does not claim a process wherein "the coefficient of linear thermal expansion of the transition metal is greater than that of the transition metal silicide". It is noted that the features upon which applicant relies (i.e., a process wherein "the coefficient of linear thermal expansion of the transition metal is greater than that of the transition metal silicide") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Further, thermal-swing is merely a recitation of the intended use of the claimed reacting agent. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative

Application/Control Number: 09/901,433

Art Unit: 1754

difference as compared to the prior art. See In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963).

It is argued that Burgie et al. ('872) discloses a process...

(Table 1). This is not persuasive because Applicant appears to admit that Burgie discloses recovering HCl and chlorosilanes

(see Table 1). It is noted that the features upon which applicant relies (i.e., recovery of silanes that are other than "low boiling" or "suitable" for use in a "CVD process") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 09/901,433 Page 5

Art Unit: 1754

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M. Johnson whose telephone number is 571-272-1352. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-0987.
